1. To turn in your wireframe, submit the GitHub URL for the wireframe image you exported above.
   https://rbnalitt.github.io/ist263/lab06/wireframe.png

2. Submit the GitHub URL for all three pages from this lab plus the URL for the CSS file.
   https://rbnalitt.github.io/ist263/lab06/contact.html
   https://rbnalitt.github.io/ist263/lab06/skills.html
   https://rbnalitt.github.io/ist263/lab06/style.css

3. In your book on pages 301-302 are a list of font and text properties. Pick a property off this list that we did not use in either the lecture or lab. Explain how you could see this property being applied to something on either the bio, skills or contact pages to make the design better.
   White space because it could make white space in between the text and make the user understand everything better.

4. Hand it the peer copy document review with answers to these questions. Note that I have read all the copy documents, and everyone has something to improve. Don't say everything is great.
   a. Who's copy document did you review?
      Ethan Nagorsky
   b. What typos are in your partner's copy document?

"Eventually I started learning out in Colorado, Utah, and Vancouver.." take out "out"- not needed.

Not many typos.

   c. What didn't they communicate clearly? Give me details here?
      Ethan's goal was to talk about snowboarding and skiing but I feel this goal got a little lost in the second page and turned into more talking about a vacation. It is very interesting but I feel it was not what he wanted to do.
   d. Did the copy seem like it was too much/not enough? Explain.
      A lot of words and story-telling which means a lot of reading. When going to a website you do not necessarily want to read paragraphs. Change the format to make it more user friendly and interactive.
   e. Where could your partner use headings, bullet points, etc. to make the copy stand out more to users?
      On the second page when talking about Zermatt instead of putting it in paragraph form you can format it in bullets to keep the reader more engaged.

    f. Any other comments?

Instead of talking about Zermatt in the second page maybe make it into more of a blog and give skiing tips on the second page and then tell a skiing story on the third page like you did.

5. Submit answers to the following:
   a. What questions did you have about the lab?

   The only question I had was making the chart zebra.
   b. What was the hardest part of the lab?

   The hardest part was making the chart zebra.
   c. Rate your comfort level with this week's topics.

   1 ==> I can do this on my own and explain how to do it.
